📍 Porto, Portugal

SUMMARY

Focusing on Java and Angular technologies, looking to transition into a junior role. My background in Software Engineering gave me a solid foundation in programming principles. I have previous experience working as a Full Stack Developer, where I improved my skills in Java, Spring Boot, Angular, NodeJS, Docker and SQL. I'm looking for challenging opportunities to continue learning and growing in this area, and excited about contributing to innovative projects while advancing toward leadership responsibilities.

PROJECTS

FULL STACK DEVELOPER

Konica Minolta   Sep/2023 - Present

Responsible for maintaining and fixing features of a project management system used by a higher education institution. Additionally, led the development of a new web system to manage all students of the institution and create communities similar to LinkedIn. Both projects required integrating existing data from the institution into the systems.

Technologies:
- Languages: Java, JavaScript
- Web Frameworks: Angular, Spring Boot, Node.js
- Database: MySQL
- Version Control: Git
- Architecture: MVC
- Deploy: CI / CD, Nginx
- Tools: Postman, OpenAI API, PowerShell

FULL STACK DEVELOPER

NOS SGPS   Jan/2022 - Sep/2023

Development of a comprehensive web system for managing financial data and processes, specifically designed for the finance sector. The system allows users to automate tasks, gain valuable insights from the collected information, import reports, and efficiently manage disputes.

Technologies:
- Languages: JavaScript, TypeScript, Python
- Web Frameworks: Angular, Express, Node.js
- Database: SQL Server
- Version Control: Git, Jira
- Architecture: MVC
- Deploy: IIS, Docker, CI / CD
- Tools: Postman, Azure, PowerShell
